Accepted 21 June, 2021

**EDITORIAL NOTE**

I am pleased to announce that the International Journal of Medical Advances and Discovery is an open access, peer-reviewed international journal that welcomes original research articles and reviews on the most recent advances and discoveries in life sciences, preclinical and clinical medicine, and related disciplines. The journal's ISSN is 2756-3812. Journals thrive by publishing the most comprehensive source of discovery and accurate details on findings in all areas of the field, as well as recent breakthroughs in the form of original papers, analysis, articles, case reports, brief messages, and other formats making them freely available online to researchers all throughout the world, with no restrictions or subscriptions.

Chemical Abstracts Service (CAS), Academic Resource Index, WorldCat, AcademicKeys, Index Copernicus, J-Gate Portal, Electronic Journals Library, Citefactor, and Genamics JournalSeek index and abstract all published papers in this journal, and all published articles are permanently stored. Digital Object Identifiers are assigned to all published articles (DOI).

IJMAD is especially interested in publications that detail significant advancements in medical research, disease treatment, and patient quality of life. Manuscripts describing how medical science has altered healthcare, extending and improving the quality of life for millions, are invited in this regard.

Authors can use the online tracking system to submit papers and track their progress toward publication. As every

report that is to be made public must be submitted within 45 days of receipt. The time required for various processes such as quality control, peer review, and paper preparation ranges between 4 and 5 weeks. The performance reviews and peer review processes take 14 days to complete, and the submission deadline is only 7 days after the reviewers and editors have accepted.

Volume 8 and Issue 1 of the IJMAD will be released. Peer review is a system for evaluating a manuscript's quality before it is published. Qualified scholars in the appropriate study area evaluate submitted manuscripts for originality, validity, and significance to assist editors in deciding whether or not to publish the manuscript.

Without subscription fees or registration hurdles, all articles published by this journal are made freely and permanently accessible online shortly after publication. Additionally, writers of articles published in this journal are the copyright proprietors of their articles and have allowed any third party the right to use, reproduce, or disseminate their articles in advance and in perpetuity.

I'd like to thank all of the writers, reviewers, and other supporter groups for their contributions to the final editing of the published articles, as well as the editorial assistant's help in resolving IJMAD concerns in a timely manner. I owe them a debt of gratitude for motivating me to appreciate the work and progress of other organisations that contribute to the successful publication of articles.
